FROM THE AMERICAN PEOPLE

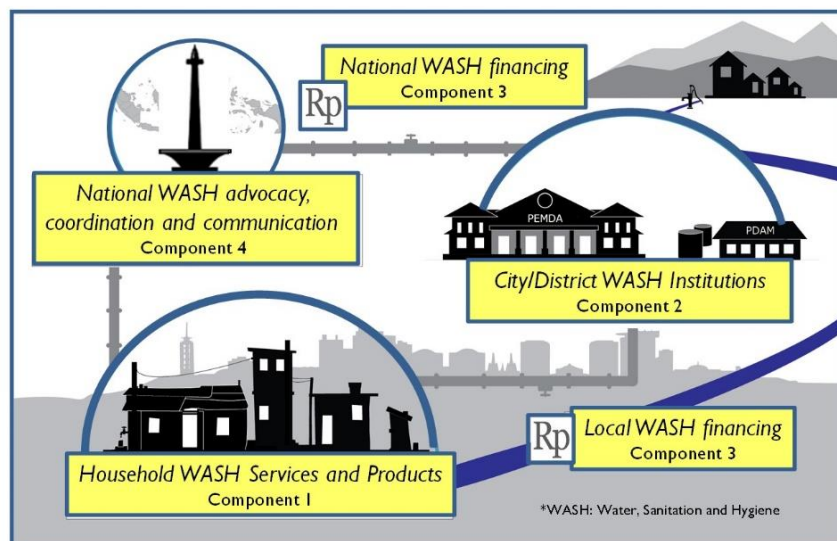

## USAID IUWASH PLUS

The USAID Indonesia Urban Water, Sanitation and Hygiene '*Penyehatan Lingkungan untuk Semua*' (IUWASH PLUS) project is a five-year, \$39.6 million initiative designed to assist the Government of Indonesia in increasing access to water supply and sanitation services as well as improving key hygiene behaviors among urban poor and vulnerable populations. Implemented by DAI Global LLC (under USAID contract AID-497-TO-16-00003), USAID IUWASH PLUS works with governmental and donor agencies, the private sector, NGOs, communities and others to achieve the following "high level" results:

- An increase access to improved water supply service for one million people in urban areas of which at least 500,000 are from the poorest 40% of the population (also referred to as the “bottom 40%” or “B40”); and
- An increase access to safely managed sanitation for 500,000 people in urban areas.

In support of the above, USAID IUWASH PLUS focuses on strengthening the overall urban WASH Ecosystem. The concept of a WASH Ecosystem recognizes that all sector actors— from Mayors to utilities to health center septage haulers— have an important role to play and that the linkages between them must be supported and reinforced. This concept stands in contrast to most traditional approaches to sector development that prioritize the construction of new facilities while ignoring the systemic weaknesses that undermine sustainability.

This document is made possible by the support of the American People through the United States Agency for International Development (USAID). The contents of this document are the sole responsibility of DAI Global LLC and do not necessarily reflect the views of USAID or the United States Government.

## PROJECT COMPONENTS

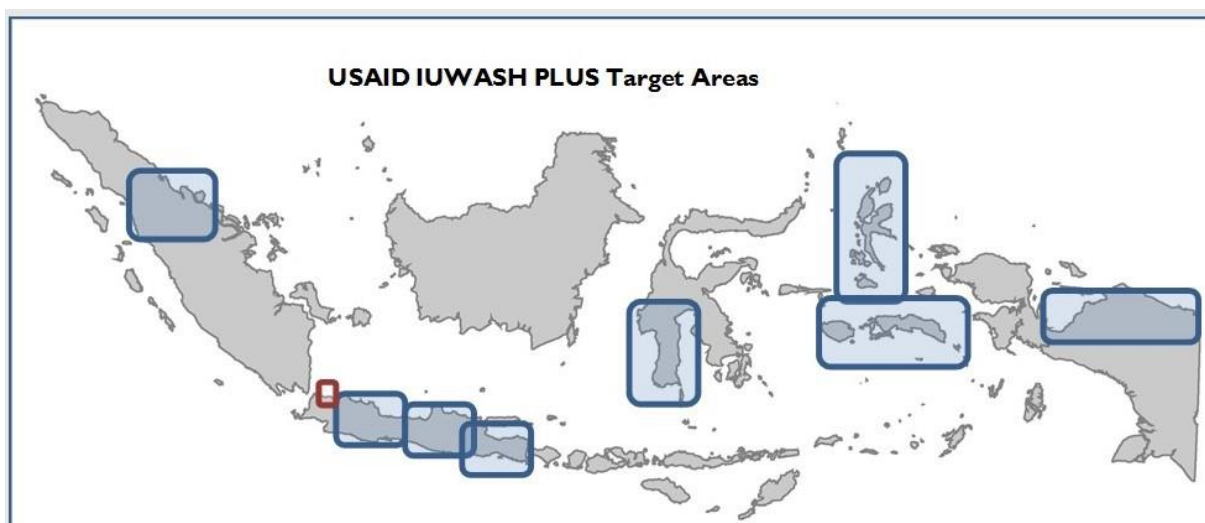

To ensure that improvements in access to WASH services are sustained, USAID IUWASH PLUS focuses on strengthening service delivery systems so they can more effectively reach the poorest and most vulnerable segments of the population. In order to achieve this at scale, USAID IUWASH PLUS undertakes activities through four interrelated components, including:

1. Improving household WASH services;
2. Strengthening city WASH institutional performance;
3. Strengthening the WASH financing environment; and
4. Advancing national WASH advocacy, coordination and communication.

In support of the above, USAID IUWASH PLUS also manages a Local Sustainability and Innovation activity that provides an opportunity to push the boundaries of WASH programming in Indonesia through the engagement of diverse stakeholders in open innovation approaches that build local capacity. With an established technology sector, a burgeoning maker movement, and a multitude of academic institutions, Indonesia is fertile ground for such home-grown solutions.

## GEOGRAPHIC FOCUS

USAID IUWASH PLUS works with 32 Local Governments across Indonesia in the provinces of North Sumatra, West Java, Central Java, East Java, South Sulawesi, Maluku, North Maluku, and Papua, as well as DKI Jakarta and Tangerang district.
